Keys to a Naturally Healthy Smile

Non-Toxic Dental Care

Modern dentistry is based on the supposition that bacteria in the mouth is what causes tooth decay and gum disease. We are urged to brush and floss our teeth, use mouthwashes and get our teeth cleaned regularly in order to maintain a healthy smile. However, in spite of our best efforts most of us still get cavities and wind up with gum disease and dentures as we get older.

But, what if these assumptions are not correct? What if the real cause of tooth decay is not bacteria at all, but rather a lack of nutrition to support healthy teeth and gums? The evidence to support this hypothesis was discovered by a dentist named Weston Price in the 1930's He proved that tooth decay and gum disease were really signs of malnutrition and deteriorating general health.

Discover the natural way to have healthy teeth and gums at this month's Healthy Habits class on **Saturday, October 10th at 9:00 a.m.** Cost: \$15/person. Bring a friend (2/\$20). Class includes: one-hour class with handouts. Register early as space is limited, email enchantedherbpantry@yahoo.com or call (575) 745-1673.
